

Ashoka Centre for a People-centric Energy Transition (ACPET)

Ashoka Centre for a People-centric Energy Transition (ACPET) has been established to support energy transition towards a net-zero economy and to address a critical knowledge gap in this pathway for India and the Global South.

Our Vision

To attain fair and equitable net-zero economies in the Global South

Our Mission

ACPET is committed to advancing India's journey toward Viksit Bharat 2047 and Net Zero 2070 by ensuring that the energy transition is affordable, inclusive, sustainable, and people-centric.

Our Thematic Areas

OUR APPROACH

Co-designing workable solutions that are community-centric, scalable, and adaptable with government, industry, and local communities

Field testing, empirical documentation, and rigorous impact evaluation of interventions

Producing academically rigorous, evidence-informed, and policy-relevant research insights

Knowledge-sharing, dissemination, and capacity-building to shape policy and practice

Energy Futures Lab

The Energy Futures Lab (EFL) is ACPET's advanced data modelling, machine learning, and analytics hub. EFL focuses on data mining, cleaning and analytics, AI/ML models, energy dashboards, algorithm development, dashboards, and

Energy Meteorology
Dashboard

Critical Mineral

on data mining, cleaning and analysis, AI/ML models, energy scenarios, algorithm development, dashboards, and interactive climate and meteorology tools. The EFL supports all ACPET's thematic areas to produce futuristic policy insights. Its foresight-driven incubation platform, ACPET REBOOST (Research on Energy Futures for Building Ongoing Operational Systems and Techniques), also hosts multiple consortium partners from the energy sector.
